DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 3 and 5-13 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The previously applied art, Lettington (WO 114587) teaches a polarizing element that selectively transmits one polarization while reflecting another; however focusing of either polarization is neither taught nor suggested. Nikolov (US 2005/0201656) which was also previously applied fails to compensate for the focusing deficiency of Lettington. Neither reference teaches supporting the polarizing element on the surface of the optical corrector.

The closest art of record, Anderton et al. (US 6,587,246) discloses an apparatus for selectively reflecting and focusing or transmitting radiation of a particular polarization and teach the use of an optical corrector in conjunction with the polarizer. However, Anderton et al. do not teach or fairly suggest an optical corrector having a first convex surface on which a polarizing element is supported, where the polarizing element focuses reflected radiation of a particular polarization.

Bly (US 4,515,443) teaches a reflective polarizer in the form of a Mangin mirror for an infrared detector, but does not teach the polarizer to selectively transmit certain polarizations while reflecting another polarization.

As claims 3 and 5-13 are dependent on claim 1, they are found to be allowable for at least the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to YARA B. GREEN whose telephone number is (571)270-3035. The examiner can normally be reached on Monday - Thursday, 8am - 5pm.
